# **STATEMENT OF WORK** **FOR** **ECONOMIC DATA SERVICES**

## **I. BACKGROUND**

The FAA requires these economic data services to forecast aviation activity and workload for manpower planning and aviation trust fund analysis. These forecasts use econometric models and forecasts of economic activity in the U.S., World, and in U.S. metro areas as key inputs.

## **II. WORK SCOPE**

The Contractor must provide two subscriptions for the following economic services:

1. Comprehensive World Economic Service, including Global Risk Analysis
  - a. Client Service and Support:
    - Client Service: Telephone access to the World Service staff both in Eddystone, PA, Lexington, Mass, and overseas for general support and discussion of forecasts and related planning issues.
    - Two on-site executive outlook presentations by senior staff or three complimentary consulting days. Direct travel costs are billed separately.
  - b. Forecast Reports:
    - The World Economic Outlook, Volume 1, Developed Economies: This report provides medium-term (five years) annual-frequency forecasts for developed economies with detailed forecast tables and analysis for each of the developed economies. Less-developed economies are grouped into six regions. The reports are issued four times a year. Developed economies include Canada, U.S., Japan, Germany, France, Italy, United Kingdom, Australia, Austria, Belgium, Denmark, Finland, Greece, Iceland, Ireland, Netherlands, New Zealand, Norway, Portugal, South Africa, Spain, Sweden, Switzerland, and Turkey. Forecast data are also shown at quarterly frequency for Germany, France, United Kingdom, Canada, Japan and the U.S. for the first two years of the forecast.
    - The World Economic Outlook, Volume 2, Developing Countries and Eurasia: Medium-term forecast reports for less-developed countries with key macroeconomic indicators and an executive summary for each of the developing economies (60 countries) issued four times a year.
    - The World Economic Outlook, 20-Year Extension: This report provides a long-term global projection with particular emphasis on supply factors such as population growth, labor force participation rate, and productivity growth. We also incorporate fiscal policy, monetary policy, regional trade, and economic cooperation to determine the long-run growth.
    - Monthly Outlooks: These reports provide monthly updates to 5-year forecasts of key macroeconomic variables for 120 countries in the world. In addition, these monthly outlooks provide an assessment of recent trends based upon the high frequency economic data for each country.
    - Electronic access to all related publications.
  - c. Outlook Conference: Two invitations to International Outlook Conferences, held in the U.S. in the fall and in Europe in the spring.
  - d. Database Access: On-line access to World Forecast Databases
